

VISION AND MISSION

Vision:

We envision our Barangay a progressive, peaceful, community ecologically balanced, energized, culturally enriched, community managed by religious, educated, learned , healthy, self reliant and cooperative citizens living in a politically, socially, economically and spiritually developed.

Mission:

We are willfully committed to serve patiently, resourcefully and work transparently with the active participation, cooperation and support of responsive, loyal citizenry of Barangay Tinongdan in coordination and partnership with Government Agencies and Non-government Agencies of all sectors in the effective implementation of developed programs and projects.

I. GENERAL INFORMATION

Origin of Barangay Name. Long time ago, there lived in the community a person named Ching. He was very popular to the people because of his hospitality and kindness. Many people even from distant places loved to visit him at his place.

Whenever travelers pass by and the people ask their destination, the reply of the travelers would always be *tus-Ching*, an Ibaloi phrase which means ‘to visit Ching’. From then on, the community people knew every traveler was going to Ching’s place. Soon the place became known to be called ‘Tu-Ching’. The name was changed later on and was pronounced as Tuding, which up to now is still the name of the locality.

Early Settlers. The following table contains the names of the families which are known to be the first settlers in the area. It also shows the order of entry of the different ethnic groups into the barangay.

Known early settlers

YEAR	LIST OF KNOWN EARLY SETTLERS
	Founding Families:
1890	Ducayag Clan (Ibaloi)
1895	Nicolas Comilang Family (Lowlanders/ Marcos Comilang/Guillermo Comilang-Angelo Dolonela/Nicolas Comilang)
1909	Kid-ing Family; Kid-ing married Mr. George Miles Icard, an American prospector in 1903. Later, Kid-ing formed a union with BUANGAN. They had three (3) children as follows: SERAFINO (born 1916), BOB (born 1920), AMBED (born 1922)
1920’s – 1930’s	Kankana-ey migration took place as opportunities for mine works opened
Order of entry of settlers from different ethnic groups	
1. Kankana-ey	3. Tagalog
2. Ilocano	4. Pangasinense

Creation of the Barangay. Barangay Tuding was created on November 22, 1900.

Legal Basis of Creation. Creation of eight (8) barrios under the Philippine Commission Act No. 1876 dated August 18, 1948; **Tuding**, Ampucao, Dalupirip, Gumatdang, Loacan, Poblacion, Tinongdan, and Virac.

PD No. 3590 – Revised Barrio Charter

PD No. 557 – Declaration of all barrios in the Philippines

Location. Barangay Tuding is located at northwest part of Itogon. It is bounded by Barangay Loacan to the north, Barangay Gumatdang to the south, Barangay Loacan to the east and the city of Baguio to the west.

The municipal hall is located 18 kilometers away from the barangay. The Provincial Capitol in La Trinidad is 14 kilometers away while the city of Baguio is 8 kilometers away with the barangay hall as the reference point.

Election Data. After the elections held on October 19, 2007, it was evident that more than half of the voting population exercised their right to suffrage. Out of the 3,444 who registered, 66.46% or 2,289 actually voted from the 17 different clustered precincts.

II. DEMOGRAPHIC PROFILE

A. Population

Population by Age Group and Sex. The table below contains the population distribution of Barangay Tuding according to age group and sex.

Out of the total population of 9,676 that was recorded in 2018, 52.05% were males and 47.94% were females.

Population distribution by age group and sex (2018)

Age	Male	Female	Total
0-5	23	25	48
6-11	61	57	118
12-23	79	79	158
24-35	88	90	178
36-47	102	74	176
48-59	83	80	163
60-71	128	112	240
6-9	310	286	596

C. Dialect Spoken

The dialects mainly used by the residents are the Ibaloi and Kankana-ey. There are also people who make use of other dialects such as Ilocano. Meanwhile, the Filipino (Tagalog) and the English languages are used secondarily especially in public and institutional places.

D. Livelihood

Business or trading is one of the major sources of livelihood for the residents of Barangay Tuding. It is probably due to the fact that the barangay is located near the city of Baguio. Some are also laborers.

II. NATURAL/PHYSICAL PROFILE

A. Land Area and Land Use

Barangay Tuding is the smallest in the municipality of Itogon in terms of area. It has a total land area of 501.10 hectares which is 1% of the total lire of the municipality.

The existing land area of Tuding is classified according to its issues. These are detailed in the following table.

Existing land use in the barangay

Major Land Uses	Area (Hectares)	Land Use
Alienable and Disposable		
Agricultural Areas	4.52	0.90
Settlement/Built-up Areas	345.77	69.00
Open/Grassland	45.23	9.03
Forest	95.23	19.00
Others (Water bodies & roads)	10.35	2.07
TOTAL	501.10	100

Source: Barangay Profile of Tuding, 2004

B. Topography and Slope

The barangay is generally nearly level or flat which are utilized as agricultural lands and settlement areas.

Topography

Range	Description	Estimated Area
0-3%	Nearly level	345.77
3-8%	Very gently sloping	4.52
8-18%	Gently sloping to undulating	45.23
18-30%	Sloping to moderately steep	10.35
30-50%	Moderately to very steep	95.23
50 and above	Very steep	
TOTAL		501.10

Source: Barangay Profile of Dalupirip, 2004

C. Soil Type

The soil type of Barangay Tuding is classified as Bakakeng sandy clay loam.

D. Climate

The climate characterized by two distinct seasonal patterns, the wet and the dry. The wet season is experienced from May to October and the dry season for the rest of the year.

III. ECONOMIC PROFILE

A. Agricultural Production

Crop Production. Seventy three farmers grow Baguio Beans, flowering pechay, eggplant, pigeon pea, tomato and root crops seasonal. Due to limited farm lot, farmers can only produce little volume of products which they deliver to the vegetable trading post in Baguio.

In the interview conducted, 172 respondents (100%) claimed to have planted fruit bearing trees such as banana, jackfruit, mango, citrus and avocado, among others to their agro-forestry plantation, backyard and kaingin farms. It was also observed that almost all houses have fruit bearing trees near their houses. They have also grown *camote* (sweet potato), *gabi*, cassava and peanut at their *uma* (cropland) purposely for home consumption and food for their animals. However, they bring to the market the excess of these root crops that the family cannot consume. (Source: Barangay Profile of Tuding, 2004)

Poultry and Livestock Production. Livestock raised in the barangay are mostly dogs, cattle and swine. Chicken and ducks are the main poultry raised in the locality commonly of native breeds and raised in the backyard farming scale.

Number of Livestock and Poultry

Type	Number
1. Poultry	5,022
2. Dog	982
3. Swine	610
4. Duck	91
5. Cattle	61
6. Goat	40

Source: Itogon Municipal Agriculture Office, 2007

B. Trade and Industry

Mining. Itogon, being host to the country’s premier gold mining companies, is classified by national classification as a first class municipality.

Mining remains as the top economic earner despite the closure of big mining companies in the past decade. The recent surge of the price of gold has revived the mining industry. Small-scale mining operations currently prevail over the abandoned quarries of the big companies that have earlier ceased operations.

Small scale mining does not contribute directly to the municipal treasury through existing taxation instruments. However, it provides widespread employment and precipitates secondary economic derivatives that emanate from the capital dynamics of the gold enterprise. The table below shows the tabulation of the mining areas within the barangays of Itogon. (Source: Itogon ADSDPP)

Tabulation of mining areas

Barangays	Patented Mining Claims	Leased Mining Claims	Total Area of Claims
Ampucao	253.88	500.69	754.57
Dalupirip	-	-	-
Gumatdang	72.77	77.05	149.82
Loacan	139.59	5.77	145.36
Poblacion	9.88	439.42	449.30
Tinongdan	-	-	-
Tuding	142.87	40.15	183.02
Ucab	328.72	58.71	387.43
Virac	35.97	29.14	65.11
TOTAL	983.67	1,150.93	2,164.60

IV. INFRASTRUCTURE AND UTILITIES

A. Agricultural Facilities and Support Infrastructure

Public Market. No public market is found in the barangay but there exist a talipapa. Basic needs are bought at the city of Baguio.

Rice Mill, Potato Seed Storage House and Greenhouses. There are no rice mills or potato seed storage houses in the barangay. However, there are five greenhouses found in the locality and these are all privately owned. (Source: MAO, Itogon 2009)

Irrigation System. Only two irrigation systems are present in the locality according to the National Irrigation Administration or NIA. The following table contains the list of the irrigation systems present in the barangay together with its service area and number of farmer beneficiaries.

Irrigation systems present in the barangay

Name of Source of Irrigation System	Service Area	Number of Farmer Beneficiaries
1. Beleng Communal Irrigation System	10	15
2. Lower Lucnab Communal Irrigation System	27	21

Source: National Irrigation Administration, 2008

B. Transport Infrastructure and Transportation Facilities

Roads. There are 11 existing barangay roads in the locality as per Municipal Planning and Development Office (MPDO) recent records. Aside from the barangay roads, one provincial road and three national roads also traverse parts of the barangay.

Barangay Tuding is accessible to any types of vehicles and majority of the transport services being used are motorized and have regular trips. The main transport facilities used by the residents are the public utility jeepneys (PUJs), but taxi cabs and tricycle are also an alternative.

The following table details the public transportation facilities available within the barangay.

Transportation facilities

TYPE	No	DESTINATION	TRAVEL TIME	FARE
Public Utility Jeepney				
1. Tuding Express	15	Baguio to Sagada Hill	30 minutes	P14.00
2. Mangga	15	Baguio to Mangga	25 minutes	P13.00

Live Births and Infant Mortality. No cases of infant death were recorded by the Barangay Health Station for the year 2019. The following table contains the number of live births recorded by the Barangay Midwife.

Live Births (2006-2008)

	2019
Live Birth	160

Source: Barangay Health Station

Health Facilities and Manpower. The only hospital found in the municipality is located at Barangay Tinongdan, the Itogon Municipal Hospital (IMH). There is also the Municipal Health Office (MHO), located at Barangay Poblacion, where the doctor, nurses, dentist and sanitary inspector are stationed. The services they render are municipal wide.

Moreover, a Barangay Health Station is present, where a midwife is assigned. There are also five barangay health workers and two barangay nutrition scholars detailed in the community to monitor the health condition of the residents and provide the needed assistance.

Water Supply. All households of the barangay have access to water supply and most are benefiting from the water works constructed by the government. Most of the total number of households in the barangay has level III classification of water supply. In level III, a common faucet system coming from the water source is establishment near a cluster of households where these household can fetch water.

Water supply

Existing Water Supply	No. of Household served	% to Total Household
Level I	93	3.63
Level II	761	29.7
Level III	1,706	66.6
Total	2,560	100

Source: Itogon Municipal Health Office, 2019

Toilet Facilities. The Rural Sanitary Inspector detailed at the Rural Health Unit is monitoring the compliance of all households to sanitary practices being promoted by all levels of governance like having sanitary toilet. Majority of the households in the barangay have sanitary toilets. Residents

with unsanitary toilet must improve their toilet facility and make it sanitary for the comfort and safety of the users and their neighbors as well to prevent the occurrence of disease.

Toilet Facilities

Type of Toilet Facility	Number of Household	% of total households
Sanitary Toilet (Water Sealed)	2,555	99.80
Unsanitary Toilet (Open pit)	5	0.195
TOTAL	2,560	100

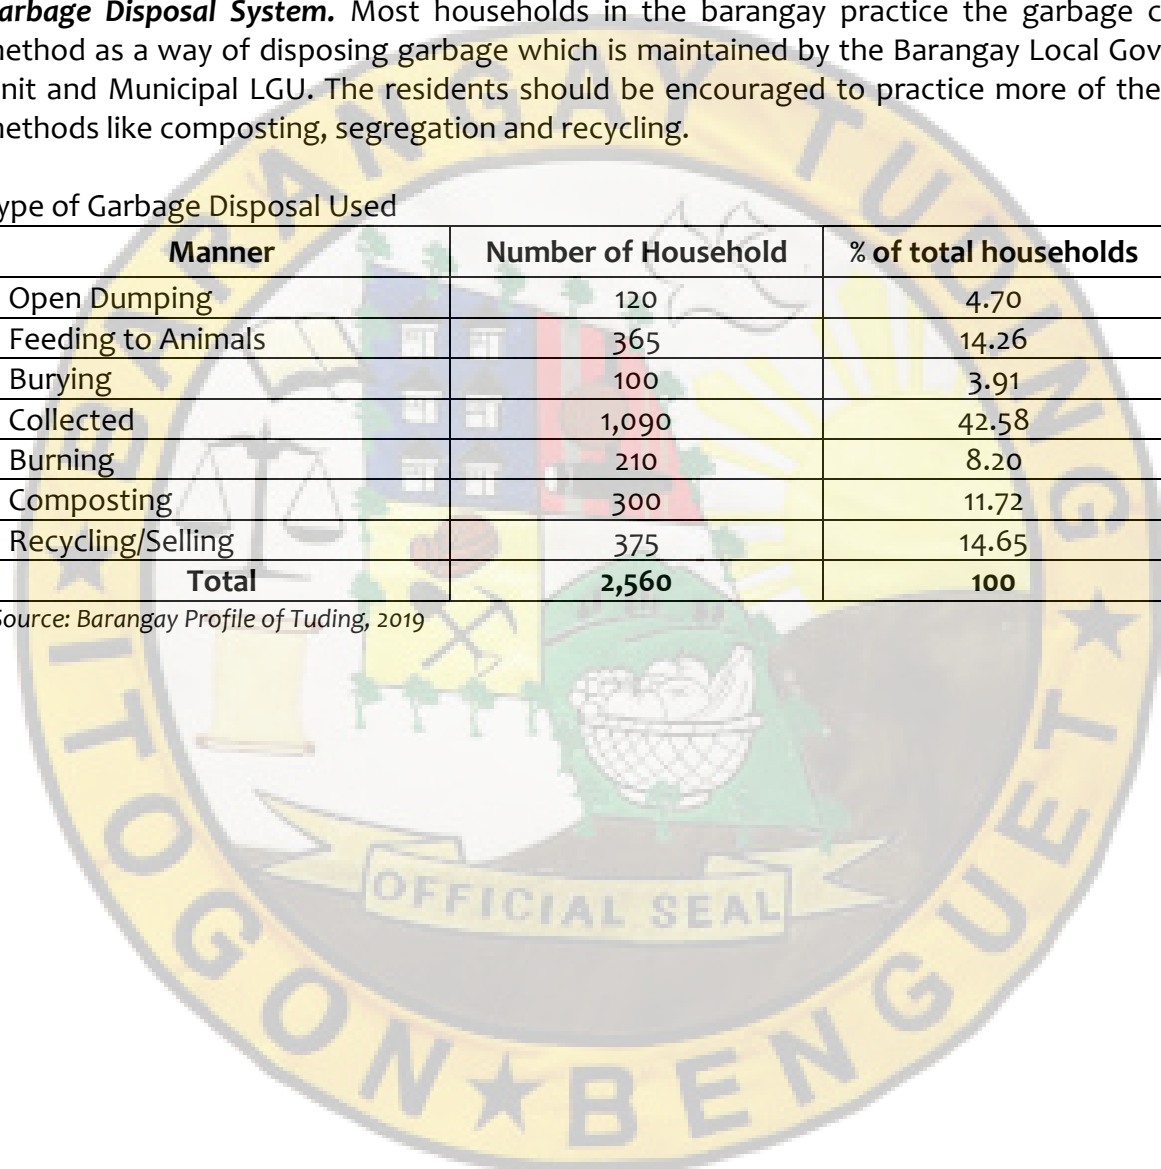

Source: Itogon Municipal Health Office, 2019

Garbage Disposal System. Most households in the barangay practice the garbage collection method as a way of disposing garbage which is maintained by the Barangay Local Government Unit and Municipal LGU. The residents should be encouraged to practice more of the sanitary methods like composting, segregation and recycling.

Type of Garbage Disposal Used

Manner	Number of Household	% of total households
Open Dumping	120	4.70
Feeding to Animals	365	14.26
Burying	100	3.91
Collected	1,090	42.58
Burning	210	8.20
Composting	300	11.72
Recycling/Selling	375	14.65
Total	2,560	100
